

## CAREERSCULPT: CARVING YOUR PROFESSIONAL FUTURE

### ABSTRACT

#### PROBLEM STATEMENT:

When choosing their professional career path in the context of education, students frequently face major obstacles. The process is hampered by a lack of exposure to a variety of career alternatives, a limited comprehension of the changing work market, and a lack of support to match individual talents and interests. Confusion and anxiety can also result from cultural expectations and pressure to pursue respectable or fruitful careers. In order to enable students to make wise and happy career decisions, it is imperative that an efficient solution be found that offers thorough career exploration, practical insights, and individualised advice. Students are empowered by "CareerSculpt: Carving Your Professional Future" because it provides in-depth career exploration, practical advice, and individualised support. By assisting students in choosing meaningful careers that complement their abilities and interests, it reduces uncertainty and anxiety brought on by societal expectations. This initiative shapes each student's own professional journey using interactive technologies, pointing them in the direction of a fruitful and fulfilling future.

#### OBJECTIVES:

- To provide diverse career options to expand students' understanding of potential paths.
- To deliver real-time data on evolving job trends for confident decision-making.
- To match individual strengths and interests to suitable career choices.
- To reduce uncertainty and societal pressure by providing personalised guidance for making confident decisions.
- To utilize technology to sculpt each student's unique professional journey towards success and fulfillment.
